MONDOLFO FERRO

WHEEL ALIGNMENT THEORY AND PROCEDURES

Ν	0	tes	5

Necessary preconditions:

A basic knowledge of geometry check is advisable.

- Electrical steering reset
- Hints concerning ADAS wheel alignment-related systems

Price for the course

EUR

300

per person VAT NOT INCLUDED

Code

X50 Corso 7

At the end of the course the participant will be able to:

- Understand the theoretical principles on the characteristic wheel alignment angles and recognise their effect on the tyre and when driving the vehicle
- Accurately perform all operations required for wheel alignment, ensuring compliance with technical standards
- Identify and apply the optimal procedures for proper and effective adjustment of the angles
- Perform the electrical steering reset procedures
